# Thunkable: Assignment 2

Copy the Template App

- Click the shared link we sent in #general
- Click the "Thunkable" logo in the upper left corner to exit out to your projects (you should now see HandwashTimer_Template in the list)
- **Make a copy** of this app by clicking "Duplicate"
- **Rename** the copy to "HandwashTimer_LASTNAME"

Finish "DoSlideShow"

- Use code blocks to finish the function like we did in class
- The app should cycle through all the images at 2-second intervals
  - We have the first image started for you
- Check out the lecture slides/videos for help with this

Add Text_to_Speech

- In the code blocks, find places where we change text (i.e. "set Text to...")
- Whenever the text changes, add a text-to-speech block to verbally announce the new text
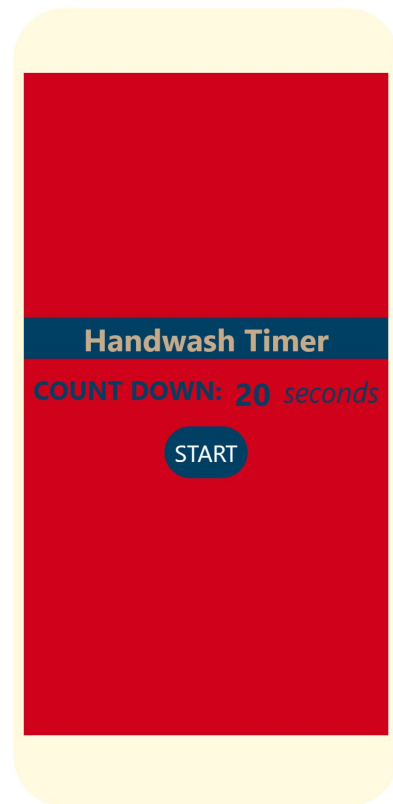

Make it your own!

Change at least one aspect of the app. Maybe...

- The background color
- The images in the slideshow (make sure they're royalty-free; see suggested sources below)
  - https://material.io/resources/icons/
  - https://thenounproject.com/
- What the text-to-speech says aloud

...or many more!

Be creative! We will be featuring outstanding submissions on the course website.

Handwash Timer

COUNT DOWN: *20 seconds*

START

Submit

- Make sure the app is named "HandwashTimer_LASTNAME"
- In the upper-right corner of your app, click "Share"
- Click "Generate Link"
- Click "Copy" or select the text to copy the link
- Submit the link here: https://forms.gle/exV41izACiUXCPm4A
